Introduction

What does it do?

Thank you for your interest on the CC Facebook Publisher, if you find some bugs or have problems feel free to send an Email to mho@coelnconcept.de!

This extension allows you to share your tt_news article directly to a Facebook Fanpage.

Screenshots

Configuration

To set up all the functions you have to enter your App ID and App Secret. Then you have to click on the button "Click here to authenticate Facebook".

By this click you will be redirected to Facebook to accept all the permissions we need to push stuff to Facebook.

Also go to the "general config" and insert the page ID of your tt_news details page and set the correct domain name, otherwise the baseURL is chosen.

The domain have to be like this *"http://domainname.tdl"*.

Also you can select the default image here.

FAQ

Q: How to get the App ID?

A: You can generate your App ID here => <https://developers.facebook.com/apps>: How can I decide which method i want to use? Directly posting when saving a article or post the article in a second step.

Administration

See "Configuration"

FAQ

Q: How can I decide which method i want to use? Directly posting when saving a article or post the article in a second step.

A: You can choose it in the BE modul "Facebook" in tab "general config".

Known problems

1. There are some problems when you show tt_news article on more than one page
2. Frame opens in a new window when authenticate. ? Close the window and reload the BE page new.
3. You have to make a new App or remove the permissions from Facebook when authenticate
4. Multidomain actually is not supported

To-Do list

- Better documentation
- realURL when having more than one newspaper
- Problems with authentication when redirect, see "Known problems"
- You have to make a new App or remove the permissions from Facebook when authenticate
- Multidomain
