Introduction

What does it do?

Extension for subscribing to and unsubscribing in majordomo mailing lists.

Features

- A plugin with two frontend elements
 - a form for subscribing and unsubscribing,
 - a content element with a confirmation message.
- The plugin verifies mail addresses.
- Subscribers and unsubscribers will get a confirmation mail.
- You can configure the plugin with an interface, you don't need to know nothing about TypoScript.
- The plugin is configurable by editors.
- With DRS - Development Reporting System. It supports you in cases of a unsuccessfully configuration.
- Language support.

What do you need

- A majordomo installation on your server or on a third party server.
- An existing majordomo mailing list.

Update

- Please read the section "Update" below.

Manual in PDF

You find this manual as PDF file at

- doc/manual.pdf
- http://typo3.org/extensions/repository/view/majordomo/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf

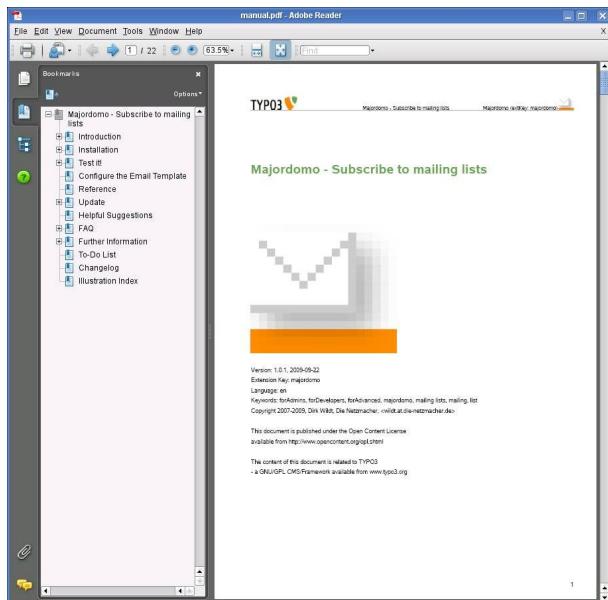

Illustration 1: Manual in PDF format

Screenshots

Frontend

The screenshot shows a news article titled "Mit Brecht unter den Trollen". The article discusses a performance at the Theater am Schiffbauerdamm in Berlin. It includes a small image of a hand holding a mask, a list of performances, and a sidebar with a newsletter sign-up form.

Illustration 2: A website with the majordomo plugin "form"

The screenshot shows a confirmation message: "Your subscription was successful! Thanks for subscribing. You will get a confirmation email within visually.com." The page layout is identical to Illustration 2, with news articles and a newsletter sidebar.

Illustration 3: A website with the majordomo plugin "confirm"

Configuration

The screenshot shows the "Pagecontent [10] - Plugin Majordomo" configuration. Under "Plugin Options", "Content Element" is set to "Form" and "Configuration" is set to "puppenspiel-portal.eu". The "Confirmation Page" is set to "Bestätigung". A checkbox "Show secondary options (palettes)" is checked.

Illustration 4: Screenshot of the plugin in the backend

The screenshot shows the "Majordomo Configuration [2] - puppenspiel-portal.eu" configuration record. It includes fields for "Major List" (puppenspiel), "Email of the Majordomo Server" (mailserver@silke-wilhelmsen.info), "Email of the List Owner" (owner-puppenspiel@silke-wilhelmsen.info), "Default Email in the Input Field of the Form" (name@meine-domain.de), and "Forbidden Mails (comma separated)" (newsletter@puppenspiel-portal.eu). A checkbox "Show secondary options (palettes)" is checked.

Illustration 5: Screenshot of the configuration record

DRS - Development Reporting System

The screenshot shows developer logs from the "Developer Log" section of the TYPO3 backend. It highlights three entries related to Majordomo:

- Entry 1: "INFO/MAIL] Email to Majordomo Server: [INFO/MAIL] Your email to owner-puppenspiel@silke-wilhelmsen.info is successful." (line 190)
- Entry 2: "INFO/MAIL] Change the email template! Please call us at +49 30 21 90 10 00 or visit http://LANG.de/majordomo_subscribe_subjct [INFO/MAIL] Change the email template! Please call us at +49 30 21 90 10 00 or visit http://LANG.de/majordomo_subscribe_subjct [INFO/MAIL] Change the email template! Please call us at +49 30 21 90 10 00 or visit http://LANG.de/majordomo_unsubscribe_body [INFO/MAIL] Change the email template! Please call us at +49 30 21 90 10 00 or visit http://LANG.de/majordomo_unsubscribe_body" (line 42)
- Entry 3: "[INFO/MAIL] Mail isn't sending. [INFO/MAIL] Email to Majordomo Server: [INFO/MAIL] To: angela.merkel@silke-wilhelmsen.info [INFO/MAIL] Content-type: text/plain; charset=UTF-8 [INFO/MAIL] From: owner-puppenspiel@puppenspiel-portal.eu [INFO/MAIL] Reply-to: owner-puppenspiel@silke-wilhelmsen.info [INFO/MAIL] Subject:puppenspiel-Newsletter: Ihr Beitrag in unserem Verteiler [INFO/MAIL] Herzlichen Dank für Ihr Interesse an unserem Newsletter. [INFO/MAIL] Wir haben Ihre Adresse in unseren email-Verteiler aufgenommen. [INFO/MAIL] Sie werden von uns regelmäßig über unsere Neuerungen informiert und erhalten die hier untenen Newsletter erhalten. [INFO/MAIL] Sollten Sie den Newsletter nicht bestellt haben, sondern Sie diese Mail unbenötigt an - den Absender oder an - owner-puppenspiel@silke-wilhelmsen.info zurück. [INFO/MAIL] Vielen Dank! [INFO/MAIL] Silke Wilhelmsen" (line 43)

Illustration 6: Logs with email to majordomo and the subscriber

Installation

Extension Manager

- Download the extension Majordomo from the TYPO3 online repository.

The screenshot shows the TYPO3 Extension Manager interface. In the left sidebar under 'Admin tools', 'Ext Manager' is selected. The main content area displays a message: 'Extension "devlog" was not available in the system. You can now import it.' It includes two options: 'Import now (opens a new window)' and 'Ignore this suggestion'. A 'Try again' button is at the bottom.

Illustration 7: Import of devlog

The screenshot shows the TYPO3 Extension Manager interface after the Majordomo extension has been installed. The main content area displays a message: 'The extension is installed (loaded and running)! Click here to remove the extension:'. It also includes a 'Configuration' section with a note about clearing the cache and an 'UPDATE! Include Static Template!' section. At the bottom right is a 'Update' button.

Illustration 8: Extension manager with Majordomo

- If you don't have installed the extension "devlog" (Developer Log), Majordomo will suggest to install it. You need "devLog", if you want to use the DRS - Development Reporting System.
- Than load the extension Majordomo.

Option: DRS - Development Reporting System

You can enable the DRS - Development Reporting System - with options in the select menu. If you enable it, the DRS will report every action of Majordomo to the Developer Log. See the section "Test it!" below.

Option Check Mode

You can enable the Check Mode. The Majordomo extension will doesn't send any email and doesn't subscribe or unsubscribe anybody. See the section "Test it!" below.

Include Static Template

The screenshot shows the TYPO3 Template Tools interface. In the left sidebar under 'Web', 'Template' is selected (marked with a red '1'). The main content area shows a tree view of page structures under 'puppenspiel-portal.de' (marked with a red '2'). On the right, a 'Template Tools' panel shows 'TEMPLATE INFORMATION:' for the 'index' template. It includes fields for Title, Sitetitle, Description, Resources, Constants, and Setup. A note at the bottom says 'Click here to edit whole template record' (marked with a red '3').

Illustration 9: Include static template

- Select the item "Template" in the web modul.
- Select your root page or the page in the page tree, where you want to use the majordomo plugin.

3. Click on the line "Click here to edit ..." below the table template tools.

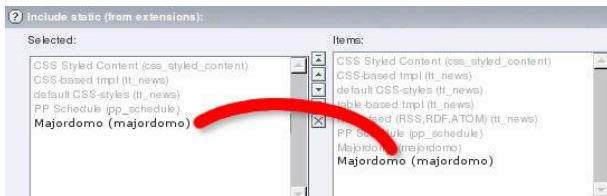

Illustration 10: Include the Static Template

- Select in the tab [Includes] the item "Majordomo (majordomo)"
- "Majordomo (majordomo)" will be added to the selected items.

Create three Pages

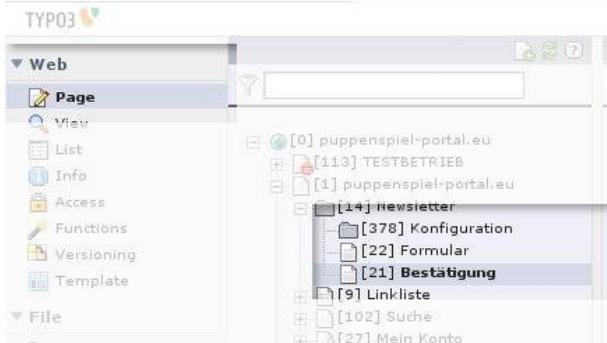

Illustration 11: Three pages

Create three pages like in the example above

- Configuration (it has the uid 378 in our example)
- Form (uid 22)
- Confirmation (uid 21)

Add a Majordomo Configure Record

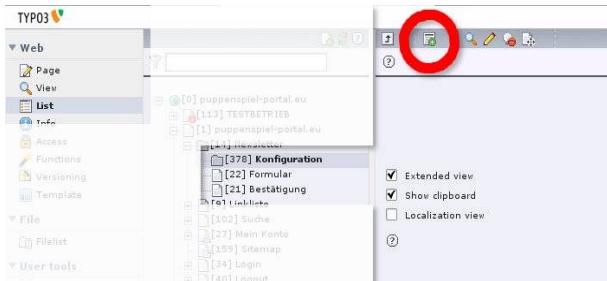

Illustration 12: Web > List - Add a record

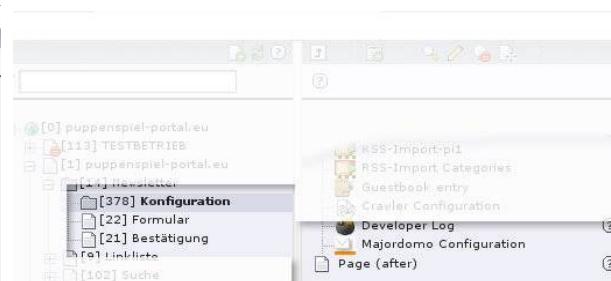

Illustration 13: Select the Majordomo configuration record

Add the Majordomo Configuration Record to the Sysfolder Configuration (uid 378) like in the illustrations above.

Configure Majordomo

Basics

The screenshot shows the 'Basics' tab of the Majordomo Configuration interface. The 'Title of the Configuration' field contains the value 'puppenspiel-portal.eu'. A checkbox labeled 'Show secondary options (palettes)' is checked.

Illustration 14: Basics

Name your configuration.

Recommended titles are

- Name of the website
- Name of the majordomo list

Form

The screenshot shows the 'Form' tab of the Majordomo Configuration interface. It includes fields for 'Wrap Header' (containing '<h4>|</h4>'), 'Class for the Div-Tag for the Buttons' (containing 'tx-majordomo-pi1-buttons'), 'Class Button Left' (containing 'tx-majordomo-pi1-button_left'), 'Class Button Right' (containing 'tx-majordomo-pi1-button_right'), 'Size for Input Field' (containing '20'), and 'Tab Index (input|subscribe|unsubscribe)' (containing '2|3|4'). A checkbox labeled 'Show secondary options (palettes)' is checked.

Illustration 15: Form

Configure some HTML capabilities.

You can set a tab index to your form.

If you are allocates to this field the string "2|3|4" you will get the following tab indexes:

- 2: Input Field: 2
- 3: Unsubscribe Button
- 4: Subscribe Button

Newsletter

The screenshot shows a newsletter form. It features an email input field with the placeholder 'mein.name@meine-domain.de', an 'Unsubscribe' button, and a 'Subscribe' button. Red numbers 2, 3, and 4 are overlaid on the email input field, the unsubscribe button, and the subscribe button respectively.

Illustration 16: Form with Tab Indexes

Confirmation

Basics Form Confirmation Majordomo Server Email

Wrap Header

```
<h1>|</h1>
```

Wrap Text

```
<p>|</p>
```

Wrap Wrong Email

```
<span style="color:red;font-weight:bold;">|</span>
```

Show secondary options (palettes)

Illustration 17: Confirmation

HTML properties for the content element Confirmation.

Majordomo Server

Basics Form Confirmation Majordomo Server Email

Majordomo List

Email of the Majordomo Server

Email of the List Owner

Default Email in the Input Field of the Form

Forbidden Mails (comma separated)

Show secondary options (palettes)

Illustration 18: Mdom Server

- Majordomo List
 - Its the name of the majordomo list.
- Email of the Majordomo Server
 - It is the email address of the majordomo server. The majordomo server will process emails to this address as commands for subscribing and unsubscribing.

Illustration 19: Email to the majordomo server

- Email of the List Owner
 - The email of the list owner. It has to be the majordomo list owner email.
- Default Email in the Input Field of the Form

- Forbidden Mails (comma separated)
 - A comma separated list of emails. The email of the majordomo server, the list owner and the default form email will added self-acting.

Email

The screenshot shows the TYPO3 Backend configuration for Majordomo. The page title is "Majordomo Configuration [2] - puppenspiel-portal.eu". The top navigation bar includes tabs for Basics, Form, Confirmation, Mdomo Server, and Email. The "Email" tab is active. The configuration fields include:

- Name and Email of the Sender for the Confirmation Email:** newsletter@puppenspiel-portal.eu
- Name for the Bottom of the Email Text:** Dirk Wildt
- Signature in the Confirmation Email:** puppenspiel-portal.eu
Dirk Wildt
Große Arche 5
99084 Erfurt
Tel: 0341 / 21655226
- Charset of the Confirmation Email:** UTF8 (recommended) (radio button selected)
- Show secondary options (palettes):** checked

Illustration 20: Mdom Server

Configuring of the confirmation email.

This email has a template. If you want to edit the template, please read section "Configure the Email Template" below.

The illustration below displays an email to a subscriber in the email client application thunderbird.

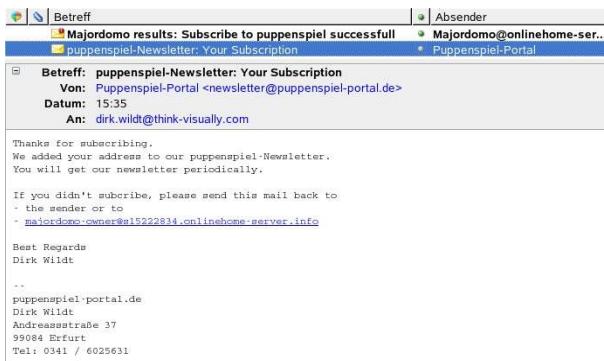

Illustration 21: Mail to the subscriber

Remove the Cache

Please remove the TYPO3 cache, if you have changed any value in the Majordomo configuration.

Configure the Plugins

Confirmation

Edit in the page properties of the page confirmation the general record storage page.

The screenshot shows the TYPO3 backend interface. On the left, the navigation tree is visible with nodes like 'List', 'Info', 'Access', 'Functions', 'Versioning', 'Template', 'File', 'Filelist', 'User tools', 'Task center', 'User settings', and 'Admin tools'. In the main area, a page tree is shown with several pages under 'TESTBETRIEB'. One page, 'Bestätigung', is selected and highlighted with a red arrow. The right side of the screen shows the 'Page [21] - Bestätigung' properties. Under the 'General' tab, there is a section for 'General Record Storage page' which is set to 'Konfiguration'. Below this, there are checkboxes for 'Stop page tree' and 'Restrict editing by non-Admins'. The 'Resources' tab is also visible.

Illustration 22: General Storage Page

Add a plugin to the confirmation page.

The screenshot shows the TYPO3 backend interface. The navigation tree and page tree are similar to Illustration 22. In the main area, the 'Pagecontent [11] - Bestätigung' properties are displayed. The 'Plugin' tab is selected, showing a list of available plugins. The 'Majordomo' plugin is selected and highlighted with a red number 1. Under 'Plugin Options', the 'DEF' dropdown is set to 'Content Element' (highlighted with a red number 2), and the 'Configuration' dropdown is set to 'puppenspiel-portal.eu' (highlighted with a red number 3). The 'General' and 'Access' tabs are also visible.

Illustration 23: Plugin on the confirmation page

1. Select the Majordomo plugin.
2. Select the content element Confirmation.
3. Select your configuration.

If there isn't any configuration, it can have two reasons:

- You didn't configure a record. Please read the section "Add a Configuration Record" in this case.
- The page configuration record hasn't any general record storage.

Form

This screenshot is identical to Illustration 23, showing the 'Pagecontent [10] - Plugin Majordomo' properties. The 'Plugin' tab is selected, showing the 'Majordomo' plugin selected (red 1). Under 'Plugin Options', the 'DEF' dropdown is set to 'Form' (red 2), and the 'Configuration' dropdown is set to 'puppenspiel-portal.eu' (red 3). The 'General' and 'Access' tabs are also visible.

Illustration 24: Plugin on the confirmation page

Edit in the page properties of the page form the general record storage page (see example confirmation page above).

Add a plugin to the form page.

1. Select the Majordomo plugin.
2. Select the content element Form.
3. Select your configuration.
4. Select the confirmation page.

Test it!

Enable the Check Mode

The extension is installed (loaded and running)!

DRS - Development Reporting System [drs_majordomo]
 Messages will be written to DevLog (you need the extension drs_majordomo)

Check Mode [check_mode]
 Majordomo doesn't send any email. But if DRS is enabled, messages will be written to DevLog.

Illustration 25: Test configuration

Choose Admin Tool > Ext Manager and than the extension Majordomo.

1. Enable the DRS - Development Reporting System. Select "All".
2. Enable the Check Mode. Majordomo won't send any email, majordomo won't subscribe or unsubscribe.
3. Klick [Update].

Subscribe to Majordomo

Newsletter

mein.name@meine-dom.de

Illustration 26: Subscribe

Subscribe to majordomo with the default email.

Investigate the DRS Log!

The screenshot shows the TYPO3 Backend interface. In the top left, there's a sidebar with 'Web' and 'File' sections. Under 'Admin tools', several items are listed: User Admin, Ext Manager, DB check, Configuration, Install, Log, Indexing, Cache Management, HookList, Check Upload, ExtDevEval, and **Developer Log**. The 'Developer Log' item is circled in red. The main content area is titled 'Developer Log' and shows a log entry table. The table has columns for Date, Severity, Extension, Message, and Called. The log entries are as follows:

Date	Severity	Extension	Message	Called
22-09-09 19:59:25	info	majordomo	[INFO/DRS] DRS - Development Reporting System:	class.tx_majordomo_pi1.php line 25

Illustration 27: DRS - Development Reporting System

Choose Admin Tools > Developer Log.

Subscribe with a real Email

Now subscribe with a real Email. E.g your email. Don't take the email in our example: angela.merkel@cdu.de.

Investigate the Developer Log.

The screenshot shows the TYPO3 Backend interface with the 'Developer Log' module selected. The log entries are as follows:

1. 22-09-09 20:08:51 info majordomo [INFO/EMAIL] Email to Majordomo Server:
To: mailserver@st... From: angela.merkel@cdu.de Subject:puppenspiel erfolgreich abonniert subscribe puppenspiel angela.merkel@cdu.de
2. 22-09-09 20:08:51 info majordomo [INFO/EMAIL] Email to Majordomo Server:
To: angela.merkel@cdu.de MIME-Version: 1.0 Content-type: text/plain; charset=utf-8 FROM: newsletter@puppenspiel-portal.eu REPLY-TO: owner_puppenspiel@st... Subject:puppenspiel-Newsletter: Ihr Eintrag in unserem Verteiler Herzlichen Dank für Ihr Interesse an unserem Newsletter. Wir haben Ihre Adresse in unseren eMail-Verteiler aufgenommen. In regelmäßigen Abständen werden Sie nun unseren Newsletter erhalten.
3. 22-09-09 20:08:51 warn majordomo [WARN/CHECK_MODE] Check mode is running: Mail isn't sent [INFO/EMAIL] Email to Majordomo Server:
Sollten Sie den Newsletter nicht bestellt haben, senden Sie diese Mail unkommentiert an - den Absender oder an - owner_puppenspiel@st... zurück.
Viele Grüße
Dirk Wildt

Illustration 28: DRS - Development Reporting System with the emails

The DRS displays

1. the email to the majordomo server,
2. the email to angela.merkel@cdu.de and
3. last but not least an instruction, how to configure the email template, if you like another text.

Complete the Check Mode

Please

- disable the DRS and
- disable the Check Mode.

Configure the Email Template and HTML Output

The screenshot shows the TYPO3 Backend interface. On the left, the navigation tree under 'Web > Template' is visible, with a red '1' highlighting the 'Template' menu item. In the center, the 'TypoScript Object Browser' window is open, showing the 'Template Tools' section. A red '2' points to the 'CURRENT TEMPLATE:' dropdown set to 'page_root_108 - (puppenspiel-portal.eu)'. A red '3' points to the 'OBJECT TREE:' dropdown set to 'Setup'. A red '4' points to the 'SETUP ROOT' section where the '_LOCAL_LANG' array is expanded, showing its contents.

```

_CURRENT TEMPLATE:
page_root_108 - (puppenspiel-portal.eu)

OBJECT TREE:
Browse: Setup OL: ALL

SETUP ROOT
[config]
[includeLibs]

Update

From < 1.0

We replaced the configuration by TypoScript with the configuration by a plugin.

You have to copy your datas from your current TypoScript configuration to the configuration record.

Include Static Table

If you make an update, please load the Include Static Template again.

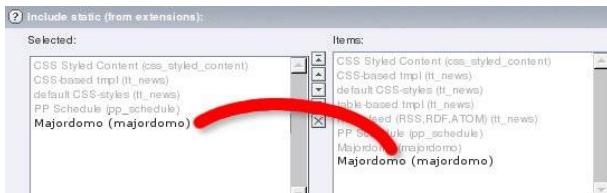

Illustration 30: Include the Static Template

Delete tx_majordomo_pi1

1. Select the Admin Tools > Install
2. Select Database Analyzer
3. Select Compare

Illustration 31: Comparing with the Database Analyzer

4. Remove the table tx_majordomo_pi1

Illustration 32: Remove tx_majordomo_pi1

Select Compare a second time.

Remove table zzz_tx_majordomo_pi1.

If you like a last check, please click the option [Compare with \$TCA].

Maintain Your Majordomo Configuration

1. Create a Majordomo configuration record
See the section "Installation > Add a Majordomo Configure Record."
2. Configure your pages with the Majordomo plugins.
Every page with a Majordomo plugin needs a general record storage page.
See section "Installation > Configure the Plugins > Confirmation."
3. Configure the Plugins
See section "Installation > Configure the Plugins > Confirmation and Form."
4. Remove your TypoScript Template, unless you are using TypoScript for removing CSS defaults or for the email templates like the code snippet below:

```
plugin.tx_majordomo_pi1 {  
    _LOCAL_LANG {  
        default {  
            mail_subscribe_subject = YOUR VALUES  
            ...  
        }  
    }  
    _CSS_DEFAULT_STYLE >  
}
```

Check Your TypoScript with the DRS

You can check your TypoScript code with the DRS - Development Reporting System. You only have

- to enable the DRS and
- to subscribe to the Majordomo list.

See section "Test it" above.

Further Information

About the plugin icon

The concept of the icon:

- The letter is symbolizing email and email lists
- The color yellow is the color of Die Netzmacher (<http://die-netzmacher.de>), the company which created the Majordomo extension.

Majordomo Website and Wikipedia

- Majordomos home site: <http://www.greatcircle.com/majordomo/>
- Majordomo on Wikipedia: <http://de.wikipedia.org/wiki/Majordomo>

Other extensions published by Die Netzmacher

-  Browser - Highway to Frontend. The Browser is the fast way for your data to the TYPO3 frontend. It displays content from related tables. You need 1 line typoscript for a result list with a search form, a record browser and an a-z browser. Images are wrapped self-acting. SEO, Search Engine Optimization. DRS supports the TypoScript configuration.
<http://typo3.org/extensions/repository/view/browser/current>
-  Juridat - Database for Juridical Data. Juridat provides a juridical data base with backend functionality. Juridat is out of the box.
<http://typo3.org/extensions/repository/view/juridat/current>
-  logical_form: A frontend plugin for evaluating forms. I.e you can evaluate mail addresses.
http://typo3.org/extensions/repository/view/logical_form/current
-  rm_staticfile: Improve your performance! This extension enables the delete of static files, which where generated by nc_staticfilecache. It is a team play with the TYPO3 cache management, ttnews, ttnewscache, sg_newsplus and sg_zfelib.
http://typo3.org/extensions/repository/view/delete_staticfile_by_3party/current
-  seo_dynamic_tag: You can generate values dynamically with this extension especially for the <title>-tag, for the <meta>-tag description and the <meta>-tag keywords.
http://typo3.org/extensions/repository/view/seo_dynamic_tag/current
-  tt_news Marker (extkey: ttnews_marker) enables to add any marker to a tt_news HTML template including links. Any marker has the std_wrap property.
http://typo3.org/extensions/repository/view/ttnews_marker/current
-  SQL tt_news select configuration (extkey: ttnews_selectconf) enables to select tt_news by any SQL clause. The extension adds an andWhere clause to the SQL query of the tt_news plugin. I. e. it is possible to display tt_news items in dependence on the ownership of a fe_user.
http://typo3.org/extensions/repository/view/ttnews_selectconf/current

To-Do List

- Nothing to do.

Changelog

- 1.1.1
New Sub Versio
 - New Features
